

# Currency Manager Tip for Drive-up Windows

Written By: Marc Barbani

## SUMMARY

Utilizing this tip you will be able to hand the pre-packaged money to the drive-up window agent in one motion.

### Step 1 — Fold

- Fold the bill(s) lengthwise making a crisp corner.

## Step 2 — Fold Again

- Make another fold width-wise about 3/4" from the bottom end of the bill(s).

## Step 3 — Put in Coins

- Prepare the exact change and insert it into the folds.

## Step 4 — Presentation

- Squeeze the bill/change packet at the fold and present to the drive through agent as a single monetary unit.

When the drive through server tells you the amount owed after you place the order, prep the money before you pull forward to pay.
